DETAILED ACTION

Election/Restriction

1. ~~Restriction to one of the following inventions is required under 35 U.S.C. 121.~~

- I. Claims 12-27, drawn to a guidewire, classified in class 60, subclass 585.
- II. Claims 28-37, drawn to a method of making a wire, classified in class 29, subclass 402.19.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the guidewire can be made by the process of extrusion through a die..

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Steven Kahm on January 9, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made

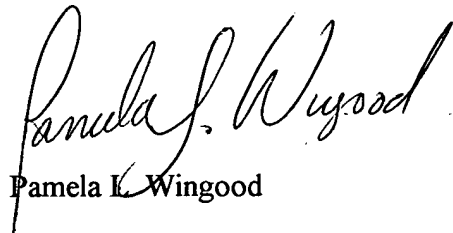

Art Unit: 3736

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CAR 1.143).

5. Any inquiry concerning this communication or earlier communications from the Examiner
